PU-TEK Upper*

High-performance fabric with exceptional abrasion resistance, made from polyurethane-coated polyester yarns for enhanced strength and durability. Lightweight, flexible, highly breathable, and water-resistant, ideal for demanding environments.

Key Features:

PU-TEK water-resistant textile upper*

Durable, abrasion-resistant, breathable, lightweight, and flexible

Breathable mesh lining

Improves airflow to keep feet cool and comfortable

Lycra collar

Soft-stretch fit for added comfort around the ankle

200 joule metal-free toe cap

Lightweight protection against impact

Metal-free protective midsole

Kevlar plate with puncture resistance

Anti-static

Electrostatic discharge protection for sensitive environments

ESD protection

Electrical static discharge

High-density removable comfort insole

Enhanced support for prolonged use

Energy absorbing heel

Reduces fatigue and impact on joints

Dual density PU outsole

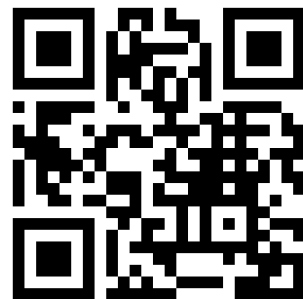

Highly slip-resistant, fuel and oil resistant for improved grip and durability

Metal-free construction

Scanner safe for secure environments

Available sizes
